

Cookie Policy – Sycharth

Last updated: 20 August 2026

1. What are cookies?

Cookies are small files or similar technologies that can be placed on your device when you visit a website. They can be used to make websites work, remember preferences, or provide information about how a website is used.

2. Cookies used by this website

The Sycharth website does **not** use Google Analytics and does not use advertising cookies for our own purposes.

The website may, however, contain an embedded **Google Maps** map. Google may use cookies or similar technologies when its services are displayed or used.

The exact cookies and technologies used can depend on how Google Maps is embedded and on Google's services and settings. We therefore recommend checking the actual website implementation periodically to ensure this policy remains accurate.

3. Your choices

Where cookies or similar technologies require your consent, you should be given an appropriate choice before those technologies are used.

You can also control cookies through your browser settings.

Please be aware that disabling certain cookies or technologies may affect the operation of some website features, including embedded third-party content.

4. Third-party services

Our website may contain links to or content provided by third parties, including:

- Airbnb; and
- Google Maps.

These organisations operate their own websites and privacy practices. When you leave the Sycharth website or interact with third-party content, their own terms and privacy policies may apply.

5. Changes to this Cookie Policy

We may update this Cookie Policy if the cookies or technologies used by the website change or if legal requirements change.

Cookie/privacy contact:

Please use the Contact Form within the Website to request further information or clarification of this Cookie Policy.
